BIOGRAPHY

UNITED STATES AIR FORCE

STAFF SERGEANT TODD R. HARDEMAN

Staff Sergeant Todd R. Hardeman is the lead Software Project Manager and Avionics Technician for the 660th Aircraft Maintenance Squadron, Travis Air Force Base, California. In this capacity, he directs digital transformation initiatives and directs logistics for a multi-billion-dollar aviation fleet.

Sergeant Hardeman is a premier innovator within the Air Mobility Command. He engineered a hardware solution for Large Aircraft Infrared Countermeasures (LAIRCM) systems, projected to avoid over $812 million in annual maintenance costs. Furthermore, he pioneered the first Unmanned Aerial System (UAS) inspection of the C-17 platform, reducing inspection duration by 92% and establishing an enterprise-wide precedent for automated maintenance. Sergeant Hardeman also engineered a global knowledge-sharing platform utilized by 10 Major Commands and 100 installations, standardizing professional development for organizational mentorship.

Throughout his career, Sergeant Hardeman has maintained and managed integrated systems for the KC-10 and KC-46 platforms in high-consequence environments. His expeditionary expertise was forged during a 2019 deployment to Al Dhafra Air Base, where his technical precision maintained a fleet of 17 KC-10 aircraft, directly enabling the delivery of 80,000 pounds of munitions against strategic insurgent strongholds. In 2025, he deployed as a Lead Systems Specialists, synchronizing global connectivity assets and secure data-link architectures, including Link-16 operations, to support national-level security objectives. His technical expertise led to his selection as the lead technical expert for a high-level safety investigation board, where he analyzed complex telemetry data to shield a 179-aircraft fleet from systemic operational risk. Prior to his current role, he was instrumental in the stand-up of the first KC-46 units and McGuire and Travis AFB, establishing the technical foundation for the Air Force's newest weapon system.

EDUCATION

2022 Principles of Instruction Course, McGuire Air Force Base, NJ
2022 Associate of Applied Science, Avionics System Technology, CCAF
2022 FCC General Radiotelephone Operator License (GROL)
2023 Airman Leadership School, McGuire Air Force Base, NJ
2024 Associate of Science, Engineering Technology, DeVry University
2025 Full-Stack Software Developer Graduate, Galvanize Inc. (SDI)
2025 Bachelor of Science, AI/ML Engineering, Arkansas State University (In Progress)

ASSIGNMENTS

1. April 2017 – June 2017, Student, Basic Military Training, 323 TRS, Lackland Air Force Base, TX
2. June 2017 – Dec 2017, Student, Instrument and Flight Control systems, 364 TRS, Sheppard AFB, TX
3. Dec 2017 – June 2021, KC-10 Instrument and Flight Control systems Journeyman, 605th AMXS, McGuire AFB, NJ
4. June 2021 – July 2023, KC-46 Instrument and Flight Control systems Journeyman, 605th AMXS, McGuire AFB, NJ
5. July 2023 – March 2025, KC-46 Avionics Craftsman, 660 AMXS, Travis AFB, CA
6. March 2025 – September 2025, NCOIC, Digital Innovations, Phoenix Spark, Travis AFB, CA
7. September 2025 – Present, KC-46 Avionics Craftsman, 6EARS, Undisclosed Location

MAJOR AWARDS AND DECORATIONS

Air Force Commendation Medal
Air Force Achievement Medal
Air Force Good Conduct Medal with two oak leaf clusters
2025 General Larry O. Spencer Innovation Award Nominee
2025 Non-Commissioned Officer of the Year Nominee
2024 Non-Commissioned Officer of the Year
2023 Non-Commissioned Officer of the Year
2022 Airman of the Year

PROFESSIONAL MEMBERSHIPS AND ASSOCIATIONS

USAF Writing Assistance Info-Share
Tavis Phoenix Spark Innovation Lab

EFFECTIVE DATES OF PROMOTION

Airman First Class June 26, 2017
Senior Airman October 10, 2019
SSgt February 16, 2023
Technical Sergeant June 01, 2026

(CURRENT AS OF JANUARY 2025)
